DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, "the upper end" has no antecedent basis.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1, and 3-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Moore et al. (5775722). Moore teaches a cover having a cylindrical outer housing closed at the upper end of an upper housing cover, a conduit formed about the lower circumference of the outer housing near the entry of the orifice as shown in Figs. 2, and 3.

The materials (col. 2, lines 25-26) are light impenetrable materials as claimed.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are

Art Unit: 3727

such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Moore et al. It would have been obvious to one of ordinary skill in the art to make the cover in the claimed dimension, since such a modification would have involved a mere change in size and/or proportion. A change in size/proportion is generally recognized as being within the level of ordinary skill in the art. (see In re Rose, 105 USPQ 237 (CCPA 1955), and In re Tanczyn, 44 CCPA 704, 766, 241).

7. Claims 1 and 2-5, are rejected under 35 U.S.C. 103(a) as being unpatentable over Moore et al. in view of Sturgeon (D370778) or Martinon et al. (4388739). To the degree it is argued the Moore does not teach the drawstring near the orifice. Either Sturgeon or Martinon teaches that it is known in the art to position the drawstring at a location near the orifice. It would have been obvious to one of ordinary skill in the art provide the drawstring near the orifice in Moore et al. as taught by either Sturgeon or Martinon to provide the desired location for the drawstring.

Regarding claim 2, it would have been obvious to one of ordinary skill in the art to make the cover in the claimed dimension, since such a modification would have involved a mere change in size and/or proportion. A change in size/proportion is generally recognized as being within the level of ordinary skill in the art. (see In re Rose, 105 USPQ 237 (CCPA 1955), and In re Tanczyn, 44 CCPA 704, 766, 241).

8. Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Moore et al. in view Spector (5135222). Spector meets all claimed limitations except for the spring clip. Spector teaches that it is known in the art to provide a spring clip 10. It would have been

Art Unit: 3727

obvious to one of ordinary skill in the art to provide a spring clip in Moore as taught by Spector to close the bag easily.
